

Factsheet Occupational Safety

Construction Work Ordinance (BauAV) 2022

The safety of our employees is a high priority. This view is supported and prescribed by the Construction Work Ordinance (BauAV) 2022.

Extract from the BauAV 2022

- At roof edges, measures must be taken to prevent falls from a height of more than 2 m (Art. 41). Measures include mounted scaffolding, railings or fall protection.
- Work on the PPE must not take more than a total of two man-days per construction project. These two man-days include all employees of all companies who work on the roof with PPE.

Costs

If the necessary safety precautions are missing, we will not carry out the work. In this case, we shall charge costs incurred in the amount of at least CHF 500 or according to expenditure.
